FAQ

1. What is the phone number of my SIM card?

You can find your phone number on the template of the SIM card. Each number starts with +423.

2. Can I call the SIM card or call from the phone number?

No. It is a data SIM card only. The phone number is not available for calls, nor can it be used for outgoing calls. The SIM card is specially designed for use with GPS trackers. M2M SIM (Machine to Machine)

3. Where can I purchase additional credit?

Credit can be purchased for another year of data flat, or if the SMS function has been deactivated for excessive use. See here:

<https://www.swisstrackgps.com/produkt/credit-1-year-flat/>

4. How can I check how much credit is left on the SIM card?

Just send us an e-mail to info@swisstrackgps.com with your order number and your SIM card number as subject.

5. Can the SIM card also be used abroad?

Due to EU roaming, you can also use the SIM card in Germany, Austria, Switzerland (including all EU countries, USA and Canada). Your SIM card is already unlocked for mobile phone use (SMS and data connection) abroad with activation. Please note that the "roaming" function may have to be activated via your cell phone.

6. What are the APN data of the SIM card?

APN name: datamobile.ag

7. How do I activate the SIM card?

You will receive the SIM card with the new mobile phone number you ordered pre-activated by us. A separate activation is not necessary.

Note:

Please note that some SIM cards are also sent in an inactive state, so please activate the new SIM card via our online service after receiving it. For the online service please send us an e-mail to info@swisstrackgps.com with your phone number and order number as subject and your SIM card will be activated immediately.

8. Put the SIM card into operation?

You can adapt our 3-in-1 SIM card to any GPS tracker. First check which format your device requires (Classic SIM, Micro SIM or Nano SIM) and then break out the appropriate one at the designated punches.
